## DETAILED ACTION

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claim 5 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The claim covers every conceivable structure (*programming the PSSU to be sliced; line 11*) for achieving the stated property (*such that its plural virtual slices are intermingled to provide effective uncrossings of ingress and/or egress signal lines of the PSSU; lines 11-13*) while the specification discloses at most only those known to the inventor.

### ***Claim Rejections - 35 USC § 101***

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claim 5 is rejected under 35 U.S.C. 101 because the claimed invention lacks patentable utility. The claim does not produce a useful, tangible and concrete result. The claim only claims a method of programming the PSSU to be sliced. The step merely manipulates numbers, signals, and abstract ideas that are not concrete or tangible.

***Allowable Subject Matter***

5. Claims 1-4 and 9-16 allowed.
